The project is a cow's farm with total area 33,000 m², the project consists of three service buildings and outdoor shed with area 6700m². The works includes all the outdoor & indoor networks. The total connected power is equal 1 MVA

Scope of work : Tender documents package and site supervision

Ref. Image

16. GUC – Solar City Project - 2015

Location : New Cairo - Egypt

GUC's Solar City Project is the first research project in Egypt for Solar Energy, which installed in the German University in Cairo. By using different devices for energy production (fixed, rotate and semi rotate), this energy park provides a total direct current power of 706KWP. There are different variations of Sun Carrier guarantee to utilize the solar energy in its most efficient way. In addition to the Sun Carrier systems there is also a Wind Carrier as a part of the generating complex of the solar park. Different types of inverters convert the generated energy in form of direct current power into 400V alternating current waveform in order to transform it into 22kV and feed the energy into the internal medium voltage grid of the GUC.

Scope of work : Tender documents package and site supervision

Ref. Image

EDUCATIONAL

1. MEMPHIS UNIVERSITY 2024

Location : New Cairo – Egypt

The project is a university with total area 70,000 m² consists of multi buildings for many facilities as Business Administration, Faculty of Engineering, Faculty of Medicine...etc. The total connected power is around 10 MVA includes all MEP disciplines for buildings, basements and infrastructure.

Scope of work : Tender documents package and site supervision

Ref. Image

2. GERMAN INTERNATIONAL UNIVERSITY BL-1 (GIU) 2020

Location : New Capital - Egypt

The project is an education complex complete with class rooms, lectures halls, labs and offices include all needed modern systems. The project consists of 6 floors area per floor is 1780 m². The total connected power is around 1 MVA.

Scope of work : Tender documents package and site supervision

Ref. Image

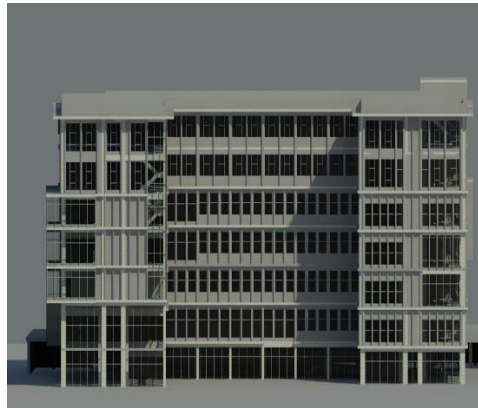

3. GERMAN INTERNATIONAL UNIVERSITY BL-2 (GIU) 2021

Location : New Capital - Egypt

The project is an education complex complete with class rooms, lectures halls, labs and offices include all needed modern systems. The project consists of 7 floors total BUA is 13,500 m². The total connected power is around 1.5 MVA.

Scope of work : Tender documents package and site supervision

Ref. Image

4. SAINT JOSEPH SCHOOL NEW CAPITAL 2020

Location : New Capital - Egypt

The project is the school consists of three buildings educational, administration and residential. Each building consists of 5 floors (B+4), project total BUA is 20,000 m² consists of labs. , classes, halls and offices, the residential building consists of bed rooms, halls and restaurant. The total connect power is around 1.5 MVA

Scope of work : Tender documents package

Ref. Image

5. HERTFORDSHIRE UNIVERSITY 2021

Location : New Capital - Egypt

The project is an education complex complete with class rooms, lectures halls, labs and offices include all needed modern systems. The project consists of 7 floors total BUA 19,500m². The total connected power is around 2MVA.

Scope of work : Tender documents package and site supervision

Ref. Image

6. EL-GOOF UNIVERSITY (FACULTY OF ADMINISTRATION AND HUMAN SCIENCE) -2009

Location : El-Goof - KSA

The project is a new faculty for administration and human science consists of four floors with total area 55,000 m², building consists of classes, offices and halls accommodate with all modern systems. The total connected power is 8 MVA.

Scope of work : Tender documents package

Ref. Image:

7. GERMAN UNIVERSITY IN CAIRO (GUC) (COMPLEX 3) – 2012

Location : New Cairo - Egypt

The project is an education complex complete with class rooms, lectures halls, labs and offices include all needed modern systems. The project consists of 5 floors area per floor is 5670 m². The total connected power is around 3 MVA.

Scope of work : Tender documents package and site supervision

Ref. Image :

8. LYCÉE FRANÇAIS DU CAIRE (SITE DE EL MERAG) – 2017

Location : Maddy - Egypt

The project is the school with around total area 26000 m². The buildings area is around 7000 m² per floor. Project consists of three floors of labs. , classes, halls and courts equipped with most modern systems. The total connect power is around 2 MVA

Scope of work : Tender documents package

Ref. Image:

9. AIRO AMERICAN COLLEGE (PHASE 2) – 2009

Location: Maddi - Egypt

The project is the middle school with total BUA 12750 m². Project consists of five floors of labs. , classes, halls and courts. The total connect power is around 0.75 MVA

Scope of work : Tender documents package

Ref. Image :

10. CAIRO AMERICAN COLLEGE (PHASE 3) – 2017

Location : Maddi - Egypt

The project is the high school with total BUA 13750 m². Project consists of five floors of labs. , classes, halls and library. The total connect power is around 1 MVA

Scope of work : Tender documents package

Ref. Image :

11. GERMAN UNIVERSITY IN CAIRO (GUC) (H BUILDING) – 2017

Location : New Cairo - Egypt

The project is an education complex complete with class rooms, lectures halls, labs and offices include all needed modern systems. The project consists of 5floors (B+4) with total BUA 9500 m². The total connected power is around 1 MVA.

Scope of work : Tender documents package and site supervision

Ref. Image :

12. GERMAN UNIVERSITY IN CAIRO (GUC) (EDUCATIONAL BUILDING) – 2016

Location : New Cairo - Egypt

The project is an education complex complete with class rooms, lectures halls, labs and offices include all needed modern systems. The project consists of 5floors (B+4) with total BUA 3800 m². The total connected power is around 0.5MVA.

Scope of work : Tender documents package and site supervision
